Objective

I am pursuing a position, which will allow me to contribute significantly toward meeting company goals by applying my analytical, organizational, and interpersonal skills.

I have been a board member/Vic-president with LPWDS for over 12 years. Haven brought idea's that were added to action. Including not limited to accepting credit cards with online payments, securing land and in the process of building a state of the art billing office, adding remote reading capabilities of our meters (changing out as we have funds available and installing on all new meter installs). Help spear headed a solution for problems with water pressure issues with great success for our system. Having server 12 years I had a few major upgrades in motion for LPWDS and would like to finish them up before retiring from the board again. They include a major upgrade on lines running on Fieldspan, Duhon , Sellers, and Breaux roads, designing and building new billing office on Fieldspan next to our field office and completing the upgrades of electronic meters to all our customers.

I would like to be considered for an additional 1 or 2 year term.

Skills

- Values the team over the individual
